- Interior Design Studios / Architecture Firms
- Furniture Brands
- Follow-Up Template

PART A

INSTAGRAM DM OUTREACH SCRIPTS

RULES FOR EVERY DM

1. **Warm up first.** Like/comment genuinely on 2-3 of their posts over 2-3 days before sending anything. Cold DMs to zero-interaction accounts get ignored or reported.
2. **Reference something specific to them** in line 1 – their new location, a recent post, their aesthetic. Never open with "Hi, we are RKN.STRUCT, a creative studio that..." – that's a broadcast, not a message.
3. **One CTA per message.** Don't pitch the whole service list. Ask one small question that's easy to say yes to.
4. **Keep it under ~60 words.** These are read on a phone between other things.
5. Cadence per prospect: Day 0 (opener) → Day 3 (bump) → Day 7 (value-add) → park if no reply.

SEGMENT 01

RESTAURANTS / CAFÉS

OPENER

Hey [Name] – saw [specific: your new branch on Zamalek / the bar refit / that shot of your counter]. Love the look.
We're RKN.STRUCT – we design + build custom metal signage, bar fixtures, and furniture in-house here in Cairo.
Quick one: are you sourcing any of your fixtures/signage custom, or off the shelf right now?

DAY 3 BUMP

Following up on this – no pressure at all. If it's useful, happy to send 2-3 quick concept ideas for [specific spot, e.g. "your entrance signage"] based on what you've already got. Worth a look?

DAY 7 VALUE-ADD

Random thought – this piece we built [attach OBJ-01 signage photo] might be close to what could work for your space. If you're ever redoing signage/fixtures, we'd love to send a concept. No obligation either way.

CLOTHING BRANDS

OPENER

Hey [Name] – your [collection drop / store setup / pop-up] looked really sharp. We're RKN.STRUCT, we build custom metal racks, displays, and signage for brands who want their store to look like their brand, not a supplier catalogue.
Do you handle your racks/displays in-house or would custom ever be worth exploring?

DAY 3 BUMP

No worries if it's not the right time – just wanted to bump this in case it got buried. Happy to sketch a quick rack/display concept in your brand's style if that's ever useful.

DAY 7 VALUE-ADD

Saw [new post/drop] – this made me think a custom rack/display system could actually be a nice extension of the visual identity. Want me to send a rough concept, no cost to look?

WEDDING PLANNERS

OPENER

Hey [Name] – [specific: a recent wedding they posted / their styling on a particular event]. We're RKN.STRUCT, a Cairo fabrication studio – we actually just built a run of custom metal matchboxes for a wedding planner, 200 pieces, all identical, on-spec.
Do you ever source custom favors, signage, or table pieces, or is that mostly bought off the shelf?

DAY 3 BUMP

No pressure – just floating this in case it's useful for an upcoming event: we can do custom metal/wood/acrylic favors, table numbers, or signage in small-to-mid batches (we've done runs of 200+ before). Want me to send a couple of ideas?

DAY 7 VALUE-ADD

Sharing a photo from that matchbox run [attach photo] – gives a sense of finish quality at scale. If you've got a wedding coming up that needs something custom-made, happy to sketch a concept, no cost to look.

IF THEY ASK ABOUT THE MATCHBOX

Yeah! A planner wanted something guests would actually keep – we designed and fabricated 200 custom metal matchboxes in-house, all to spec, on their timeline. That's basically the model: whatever the concept is, we design it, then produce it at whatever quantity the event needs.

HOTELS / HOSPITALITY

OPENER

Hi [Name] – [specific: property name / recent renovation post / opening announcement]. We're RKN.STRUCT, a Cairo-based design + fabrication studio – custom furniture, decor, and signage systems, built in-house. Is your property sourcing any custom fixtures for the lobby/rooms, or is that all handled by a supplier already?

DAY 3 BUMP

Following up – happy to put together a short concept for one specific area (lobby signage, a decor piece, whatever's most relevant) if that would help you evaluate us. Worth a quick call?

DAY 7 VALUE-ADD

Sharing this piece [attach relevant OBJ] as an example of finish quality – if there's an upcoming renovation or new property, we'd like to be considered as a fabrication partner.

Note: for hotel groups / hospitality management companies, prefer email over DM (see Part B). Use DM for independently-run boutique properties with an active Instagram.

INTERIOR DESIGN STUDIOS / ARCHITECTS

OPENER

Hi [Name] – really like [specific project they posted]. We're RKN.STRUCT, an in-house design + fabrication studio in Cairo – metal, cement, glass, wood, acrylic. We work as a build partner for designers: you spec it, we fabricate to CAD, you get a 3D render to approve before anything's cut. Do you currently have a go-to fabricator for custom pieces, or is that handled project-by-project?

DAY 3 BUMP

No pressure – just wanted to flag we're taking on new B2B partners this quarter. If a project ever needs a custom fabricated piece outside a standard supplier's range, keep us in mind.

DAY 7 VALUE-ADD

Sending over our process quickly: brief → CAD + render (you approve it) → fabricate in-house → deliver. Deposit to start, balance on delivery – no guesswork on either side. Happy to look at a drawing if you have one.

FURNITURE BRANDS

OPENER

Hey [Name] – like what you're building. We're RKN.STRUCT, an in-house metal/multi-material fabrication studio in Cairo. We partner with furniture brands as a manufacturing arm – you keep the brand and design, we handle production, any run size, no minimums. Is production fully in-house for you, or do you ever work with outside fabrication partners?

DAY 3 BUMP

Totally fine if not – just wanted to make sure this didn't get lost. If a piece ever needs metalwork that's outside your current setup, we'd be glad to quote it.

DAY 7 VALUE-ADD

Attaching an example of a piece we fabricated [OBJ example] – similar precision/finish level to what we'd bring to a production partnership. Open to a short call whenever it's useful.

INDEPENDENT ARTISTS

OPENER

Hey [Name] – your work is really striking, especially [specific piece]. We're RKN.STRUCT – we fabricate 1-of-1 sculptural/installation pieces for artists, protecting the design intent through the whole build, not just hitting a deadline. Do you fabricate your pieces yourself, or ever work with a studio for the build?

DAY 3 BUMP

No rush at all – if you're ever working on a piece that needs precision metal fabrication (or cement/glass/wood/acrylic), we'd genuinely love to collaborate. Happy to talk through an idea even if it's early-stage.

DAY 7 VALUE-ADD

Sharing this [attach 1-of-1 OBJ, e.g. candle holder] as an example of how we approach one-off pieces – full CAD + render before fabrication, so the final object matches the intent exactly. Open whenever you want to talk through something.

GENERAL REPLY HANDLING

"HOW MUCH DOES IT COST?" (no brief yet)

Depends entirely on size/material/finish – happy to give you a real number once we know roughly what you're picturing. Can you share a photo/sketch or a couple of reference images? Takes 5 min and I can give you a ballpark same day.

"Send more info": don't paste the whole profile deck into the DM. Send the trimmed one-page PDF and one relevant portfolio photo, then ask the qualifying question again.

GOES QUIET AFTER SHOWING INTEREST

No pressure at all – whenever the timing's right, we're here. Saving your idea on our end either way.

PART B

COLD EMAIL TEMPLATES

WHEN TO USE EMAIL OVER DM

Use email for accounts with a corporate structure or a generic inquiry inbox where a DM won't reach a decision-maker: hotel groups/management companies, established furniture brands, architecture firms, larger interior design studios, procurement/purchasing contacts. Use Instagram DM for independently-run restaurants, cafés, clothing brands, and individual artists – that's where they actually respond. Every email should attach the trimmed one-page profile PDF – never the full 12-page deck cold.

SEGMENT 01

RESTAURANTS / HOSPITALITY GROUPS

Subject: Custom metal fixtures for [Restaurant/Group Name] – Cairo-based, in-house

Hi [Name],

I'm reaching out from RKN.STRUCT, a Cairo-based design and fabrication studio – we design and build custom metal, cement, glass, wood, and acrylic pieces in-house, for restaurants and hospitality spaces (signage, bar fixtures, table bases, shelving, decor).

A few things that might be relevant for [Restaurant/Group Name]:

- Every piece starts as a CAD drawing and 3D render you approve before we fabricate anything – no surprises on delivery.
- No minimum order size – one signage piece or a full fit-out.
- Everything is designed, cut, and finished in one studio in Cairo, so turnaround is fast and quality is consistent across a full order.

If you have an upcoming opening, renovation, or a fixture that needs replacing, I'd like to send over a few concepts at no cost. Would that be useful?

Attached is a short overview of our work.

Best,

[Your Name]

RKN.STRUCT

CLOTHING BRANDS

Subject: Custom racks & displays that match [Brand Name]'s identity

Hi [Name],

I'm with RKN.STRUCT, a Cairo-based fabrication studio – we design and build custom metal racks, hangers, and retail displays in-house, matched to a brand's identity rather than pulled from a supplier catalogue.

We handle everything from concept sketch to finished, installed piece – one studio, no subcontracting, no minimum run size.

If [Brand Name] is opening a new location, refreshing an existing store, or doing a pop-up, I'd be glad to send a quick concept for your space at no cost.

A short overview of our work is attached.

Best,

[Your Name]

RKN.STRUCT

WEDDING PLANNERS / EVENT PLANNING AGENCIES

Subject: Custom fabrication for weddings – favors, signage, table pieces (proven at 200-piece scale)

Hi [Name],

I'm reaching out from RKN.STRUCT, a Cairo-based design and fabrication studio. We recently designed and produced a run of 200 custom metal matchboxes for a wedding planner – a favor guests actually kept, made entirely in-house, on spec and on time.

We work across metal, cement, glass, wood, and acrylic, so beyond favors we can also cover:

- Custom table numbers, place-card holders, and signage
- Ceremony/backdrop structures and installation pieces
- Branded small-batch objects for gifting or decor

Every piece is CAD-designed and rendered for approval before production, and we can produce anywhere from a handful of pieces to a few hundred, depending on the guest count.

If you have an upcoming wedding or event that needs something custom-made, I'd like to send a few concepts at no cost. Attached is a short overview of our studio.

Best,

[Your Name]

HOTELS / HOSPITALITY MANAGEMENT COMPANIES

Subject: In-house custom fabrication partner for [Hotel/Group Name]

Dear [Name],

My name is [Your Name] with RKN.STRUCT, a Cairo-based object design and fabrication studio. We specialize in custom metal, cement, glass, wood, and acrylic pieces – furniture, decor, and signage – designed and built entirely in-house.

For hospitality clients specifically, our process is built to remove guesswork on both sides:

1. Brief – you share the requirement and references (1-2 days)
2. Design – we produce CAD drawings and 3D renders for your approval before any fabrication begins (3-7 days)
3. Fabricate – laser cutting, forming, welding, and finishing, all in-house in Cairo
4. Deliver – packaged and installed, with support after delivery

Commercial terms are straightforward: a deposit to begin production, with the balance due on delivery.

If [Hotel/Group Name] has an upcoming renovation, new property, or a recurring need for custom furniture/signage/decor, I would welcome the opportunity to discuss becoming a fabrication partner. I've attached a short overview of our work and capabilities.

Would you be open to a short call in the next couple of weeks?

Best regards,

[Your Name]

INTERIOR DESIGN STUDIOS / ARCHITECTURE FIRMS

Subject: Fabrication partner for custom pieces – CAD to finished object, in-house

Hi [Name],

I'm reaching out from RKN.STRUCT, a Cairo-based design and fabrication studio. We work with interior designers and architects as a fabrication partner for custom pieces that fall outside standard supplier catalogues – furniture, fixtures, signage, and decor across metal, cement, glass, wood, and acrylic.

Because design and fabrication both happen in-house, a spec drawing becomes the object as intended – not an approximation of it. You (or your client) approve a 3D render before we fabricate, and we handle everything from CAD to finished, delivered piece.

If you have a project with a custom-fabricated element in the brief, I'd like to be considered as a build partner – happy to review a drawing or reference and give a same-week response.

I've attached a short overview of our capabilities.

Best,

[Your Name]

FURNITURE BRANDS

Subject: Manufacturing partnership – in-house metal fabrication, Cairo

Hi [Name],

I'm with RKN.STRUCT, a Cairo-based design and fabrication studio working across metal, cement, glass, wood, and acrylic.

We partner with furniture brands as a production arm for pieces or collections that need custom metal fabrication – you retain the brand and design, we handle manufacturing, at any run size, with no minimum order.

If [Brand Name] doesn't currently have in-house metal fabrication capability, or is looking for a second production partner for overflow or specific collections, I'd welcome a conversation.

Attached is a short overview of our studio and process.

Best,

[Your Name]

FOLLOW-UP TEMPLATE

Send once, 5-7 days after no reply, any segment.

Subject: Re: [original subject]

Hi [Name],

Just following up in case this got buried – happy to send a quick concept or rough estimate for [specific relevant item] if that would help you evaluate whether it's worth a conversation.

No pressure either way – always here when the timing's right.

Best,

[Your Name]

RKN.STRUCT
